

Ada Lovelace

Senior Backend Engineer · London, United Kingdom

ada.lovelace@example.com · +44 20 7946 0958 · <https://ada-lovelace.example.com>

Sample profile - a fictional candidate shipped with the Jobo Auto Apply example.

Summary

Backend engineer with nine years of experience building event-driven systems and the teams that run them. I care about idempotency, boring failure modes, and APIs that explain themselves. Most at home owning a service end to end, from schema to pager.

Experience

Analytical Engines Ltd - Senior Backend Engineer

March 2022 - present · London, UK

Own the job-scheduling platform: a Postgres-backed queue executing 40M tasks/day.

Designed the idempotency-key contract used by every internal producer, cutting duplicate side effects to zero across three years of incident reports.

Led a team of four through the migration from cron sprawl to event-driven workers.

Difference Works - Backend Engineer

June 2019 - February 2022 · Remote

Built the public REST API (TypeScript, Node.js) for a payroll product used by 900

SMEs; wrote the webhook delivery system, including signing and replay protection.

Jacquard Systems - Software Engineer

September 2016 - May 2019 · Manchester, UK

Shipped inventory ingestion pipelines processing supplier feeds in 14 formats.

Education

University of Edinburgh - BSc Mathematics and Computer Science, 2012-2016

Skills

TypeScript · Node.js · PostgreSQL · Kubernetes · Event-driven architecture · Terraform

Languages: English (native), French (conversational)

Work authorisation

Authorised to work in the UK and the Netherlands. No sponsorship required.

Notice period: 30 days.
