

Grace Hopper

Staff Platform Engineer · New York, NY, United States

grace.hopper@example.com · +1 202 555 0143 · <https://grace-hopper.example.com>

Sample profile - a fictional candidate shipped with the Jobo Auto Apply example.

Summary

Platform engineer with twelve years across SRE and infrastructure. I build paved roads: golden-path pipelines, observability that answers questions, and deploys nobody fears. I like deleting more code than I write and documenting the rest.

Experience

Compiler Works - Staff Platform Engineer

January 2021 - present · Remote (US)

Run the platform group (6 engineers) for a 200-engineer org: Kubernetes fleet, CI/CD, and an internal developer portal that cut service-bootstrap time from two weeks to one afternoon. Halved compute spend with bin-packing and spot pools.

Flowmatic - Senior Site Reliability Engineer

April 2017 - December 2020 · New York, NY

Owned reliability for the payments path (99.99% SLO). Introduced error budgets, progressive rollouts, and the incident-review culture the company still uses.

Mark One Systems - Systems Engineer

August 2013 - March 2017 · Philadelphia, PA

Automated a bare-metal fleet of 800 hosts with config management and PXE.

Education

Rensselaer Polytechnic Institute - BSc Applied Mathematics, 2009-2013

Skills

Go · Kubernetes · Terraform · Observability (Prometheus, OpenTelemetry) · CI/CD · Linux

Certifications: Certified Kubernetes Administrator (CNAF, 2022)

Languages: English (native)

Work authorisation

US citizen - authorised to work in the United States. No sponsorship required.

Notice period: 2 weeks.
